#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 24 October 2007.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Specification***

1. The disclosure is objected to because of there references to claims in the specification. The problem with reference to claims is that claims may be canceled or amended during the course of prosecution and thus render the description meaningless or inaccurate. Thus, all descriptions that made reference to claims must be amended to avoid such reference; for example, paragraph [00013].

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 7-9 and 11 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The non-polar outer surface of the particles is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The process of forming three-dimensional ("3D") object as recited in claims 9 and 11 are known. The key difference is the particles utilized in the process. The particles of the claimed invention have two coatings wherein the inner coating is polar so that the outer surface of the particles is non-polar (by directing all polar groups into the inner polar coating). Due to the non-polar outer surface, the particles have very little "tendency to agglomerate", which problem has existed in the prior art formation of 3D

object. See instant specification, paragraph [00028], [00034], [00035],[00037] and [00040]. Claims 7-9 and 11 which fail to include this critical limitation are deemed based on a non-enabling disclosure.

4. References are cited as art of interest.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. T. Le whose telephone number is 571-272-1511.

The examiner can normally be reached on 10:00 a.m. to 6:30 p.m., Mondays to Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
